The Facts

The SSDI program was created in 1956 to provide financial assistance to disabled workers and their families. The program is funded by payroll taxes that are paid by working Americans. To be eligible for SSDI benefits, you must have worked and paid Social Security taxes for a certain period of time. You must also have a disability that is expected to last for at least 12 months or that is terminal.

The SSDI application process can be complex and time-consuming. You will need to provide documentation to prove your disability and your inability to work. You will also need to attend a medical examination. The Social Security Administration (SSA) will make a decision on your application based on the evidence that you provide.

If you are approved for SSDI benefits, you will receive monthly payments that are based on your earnings history. You may also be eligible for other benefits, such as Medicare and Medicaid.

The Fraud

The SSDI program has been plagued by fraud and abuse for many years. In recent years, there have been numerous reports of people who have fraudulently claimed SSDI benefits. This has led to concerns about the integrity of the program and the potential for waste, fraud, and abuse.

There are many different types of SSDI fraud. Some people fraudulently claim to have a disability when they do not. Others exaggerate their symptoms or fail to disclose other sources of income. Still others submit false or altered medical records.

SSDI fraud is a serious problem that can waste taxpayer money and deprive deserving people of benefits. The SSA is working to combat fraud and abuse, but it needs the help of the public.

The Stories

The Facts The Fraud The Stories includes several stories of people who have been affected by SSDI fraud. These stories provide a firsthand account of the challenges that people face when they are trying to access benefits. They also highlight the importance of protecting the integrity of the SSDI program.

One story is about a woman who was denied SSDI benefits even though she had a severe disability. The SSA claimed that she was not disabled enough to qualify for benefits. The woman appealed the decision, but she was denied again. She eventually hired a lawyer and won her case.

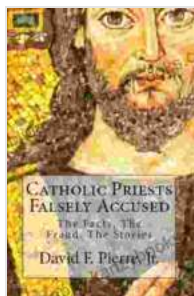

Another story is about a man who was fraudulently claiming SSDI benefits. He was caught when he was seen working at a construction site. The man

was arrested and charged with fraud. He was convicted and sentenced to prison.

These stories are just two examples of the challenges that people face when they are trying to access SSDI benefits. The Facts The Fraud The Stories provides a valuable resource for understanding the program and the challenges that you may face.
